

Proportion of scavenging in the diet

--

++

ENCOUNTER RATE

	++	Basal metabolism <i>e.g. ectothermy</i>	--	
	++	Locomotion cost <i>e.g. volancy</i>	--	
	--	Detection rate <i>e.g. vision or olfaction</i>	++	
	--	Environment <i>e.g. carrion availability</i>	++	

HANDLING TIME

	--	Food processing <i>e.g. phenotypic adaptations</i>	++	
	++	Competition <i>e.g. body size</i>	--	

Low

Trait/factor value

High

Ability to scavenge

increased ++

decreased --
